3. **Interpretation of the Euro 5 Regulation List on System Data for Diagnostic Tool Producers:**
 - 3.1. Report on second meeting of ASA with German vehicle manufactures held on 9th June 2009.
 - 3.2. Recommendations from this meeting for European meeting to be organised between EGEA and ACEA?
 - 3.3. Result of internal discussions on ISO 22900-3.
4. **Euro VI Regulation for Heavy Duty Vehicles (HDV).**

4.3. Measurements instrument requirements for NH3

Problem flagged-up by Mr. Heger from Siemens.

He wrote to us concerning NH3 slip measurements: in the Euro VI Regulation, the limits for NH3 (Ammonia) is 10 ppm. No figures for resolution or overall accuracy are quoted, but a resolution of 1% of the limit value, i.e. 0,1 ppm, would seem unreasonable. Should we try to establish the requirements for accuracy and for resolution during the legislative process? Should EGEA discuss a measurement procedure (in-situ vs. extraction)?

5. Report on state of discussions in the Euro 5 Security Forum and in CEN on standardised access to Repair and Maintenance Information (RMI) – What impact for EGEA? (depending on time left)

6. Any other business

7. Next meetings and location.

Registration

Registration for this meeting is mandatory, as we have to inform the hotel about the number of participants for the lunch buffet and the room rent. We would be grateful if you could return the attached reply form before **Thursday, 25th June 2009.**
