# Important issues from the market in Norway.

1. Vehicle lifts with fake certificates.
2. Rebuilding of workshop equipment without updating documentation

**ABL had a meeting with the Labor Inspectorate on September 19th regarding vehicle lifts that have entered the market with false documentation.**

**Our members are also informed of the latest information from EGEA and they are asked to come back soon.**

**The Labor Inspectorate is also informed about EGEA's work.**

# Rebuilding of roller brake tester. ISO 21069

- ABL members are accredited (ISO 17025) to perform accredited calibration of workshop equipment used in PTI testing.
- They discover equipment that is remodeled in Norway.
- A Norwegian supplier is re-building roller brake tester. They rebuild control systems (software) and use rolls from well-known manufacturers like German Maha, Danish BM etc.
- Company have agreements with the Road Directorate and we follow their development.
- We also request other countries to follow developments at Volvo Truck.

# Thank you.
